

BECLAU AND GREEN STAR

Beclau products contribute to the following Green Star credits:

IEQ-12 Formaldehyde Minimisation

Beclau stocks E0 mdf and melamine for use in furniture and joinery. We also use E0 Eco-core (blockboard) and E0 plywood where possible.

Mat-5 Tables

Most of Beclau's products are certified by GECA as being environmentally innovative. This means that all of our tables achieve a score of 100% in the Mat-5 calculator.

Mat-7 Joinery

Beclau can assist in meeting Green Star requirements for Joinery by providing modular solutions and designing for disassembly. As we are FSC certified, we can also ensure that all timber, including solid timber, veneer and composite wood products, meet eco-preferred content requirements.

Mat-11 Sustainable Timber

Beclau has FSC Chain of Custody certification. This guarantees that timber used in Green Star projects comes from well managed forests and qualifies for Green Star credits. Beclau is one of very few companies with this certification, and the only cabinet makers to hold it.

With FSC Chain of Custody certification we can guarantee that all solid timber, veneer and composite wood products, such as mdf, are from FSC sources. We have relationships with all major Australian FSC suppliers.

More exciting is the fact that Beclau imports its own FSC certified solid timber directly from Europe. Solid timber is imported in a range of thicknesses and lengths of up to 4500mm, especially suitable for large boardroom and meeting room tables. We currently stock the following FSC solid timber:

European Oak
European Black Oak
Sycamore

unit 15
198-222 young street
waterloo nsw 2017
t +612 9698 6422
f +612 9699 6944

beclau design furniture pty ltd
trading as beclau design furniture
abn. 15 101 907 984

www.beclau.com

As Beclau imports these timbers directly, the FSC Chain of Custody link is secure from the mill to the end client.

We will be expanding our range of FSC certified solid timbers, so please contact us to enquire about new stock.

Multiple Credit Points with Beclau Products

Specifying a Beclau product will often assist in achieving credit points in several categories. For example, a Beclau table made in an FSC certified timber such as European Oak, will achieve full points under Mat-5 tables due to GECA accreditation, as well as contributing to Mat-11 Timber.

Alternatively, the Cassandra sideboard made in European Oak would contribute to Mat-11 Timber for the veneer, solid edging and mdf substrate, as well as IEQ-12 Formaldehyde for the low-emission mdf.
